## Summary

Junior full-stack developer with 2 years of experience building web applications and integrating AI-assisted features. Proven ability to deliver responsive React/Next.js front-ends, Node.js back-ends, and SQL databases while testing and validating AI-generated code. Strong communicator eager to contribute to AI-driven automation projects.

## Experience

**Freelance Full Stack Developer** · Self-Employed · Jun 2024 – Feb 2026

- Designed and launched an AI-powered support system for DermaSculpt Clinic, cutting response time by 30% through Claude-generated code integration.
- Developed responsive web interfaces with React, Next.js, Tailwind, and TypeScript; connected to MySQL and Supabase back-ends.
- Implemented automated testing scripts to verify AI-generated code, reducing post-deployment issues by 15%.
- Managed full project lifecycle using GitHub for version control and Vercel for CI/CD deployment.

**Intern, Land Administration and Management System** · Department of Environment and Natural Resources (DENR) · Dec 2025 – Apr 2026

- Streamlined digital record handling of land titles, improving document retrieval efficiency by 15%.
- Assisted in system testing and validation to ensure compliance with technical standards, contributing to reduced errors.
- Provided technical support, including hardware setup, software installation, and troubleshooting for daily operations.

## Education

**Bachelor of Science in Information Technology** · Bulacan State University · 2022 – 2026

- Cum Laude
- Thesis: “DermaSculpt: Dermatology AI Clinic Support System”

**Information and Communications Technology** · Sta. Maria National High School / Dr. Yanga's Colleges Incorporated · 2015 – 2019

## Skills
